

## WHO WE ARE

The Florida Healthy Kids Corporation provides Florida with low-cost, high-quality health insurance for children ages 5-18.

The Corporation is a public-private partnership created to improve access to comprehensive health insurance for Florida's children. It has a history of more than 20 years of success.

Florida Healthy Kids is one of the four programs that make up Florida KidCare, joined by MediKids (1-4 years), Children's Medical Services Network/CMSN (birth-18 with special health care needs) and Children's Medicaid (age-based eligibility tied to Federal Poverty Level).

Those enrolled in Florida Healthy Kids enjoy comprehensive benefits, a choice between at least two different health and dental plans, and a regular commercial insurance ID card.

## WHAT WE DO

The Florida Healthy Kids Corporation administers the Florida Healthy Kids, MediKids, and Children's Medical Services components of the Florida KidCare program.

The Corporation is responsible for all application intake, eligibility (non-Medicaid only), enrollment, subsidy determinations, premium collection and customer service operations.

The Florida Healthy Kids Corporation puts a priority on customer satisfaction and efficiency by continuously monitoring the performance of participating health and dental plans.

## Reducing the Number of Uninsured Children

From 2008 to 2013, the number of uninsured children in Florida dropped by 222,000.

During the same period, the percentage of uninsured children fell by one-third, improving from one in six children uninsured in 2008 to one in nine uninsured in 2013.

Despite this progress, there is still much more work to be done. Approximately 445,000 children remain uninsured in our state.

## Healthy Kids Board of Directors
